IMPORTANT INFORMATION

INTRODUCTION

This guide is intended for the following regular savings and investment products:

- Regular Savings Plan
- Regular Savings Plan Malaysia
- Oracle
- Quantum (for policies taken out after April 2010)
- Quantum Malaysia
- Paragon

For Quantum policies issued prior to April 2010 under the Scottish Provident International brand, please refer to the Scottish Provident International Funds Investment Guide for the relevant fund choices.

This guide provides you with information about the funds that your plan can invest into.

If you are applying for a new plan you should speak to your financial adviser and read the rest of the literature suite in full, which can be accessed on our website www.r1360.com.

CHOOSING YOUR FUNDS

It's up to you to tell us which funds you would like your payments to be invested in. We invest your money creating "units" in the fund, and each unit is valued using the fund price. As the fund price goes up your units increase in value and as the price goes down they decrease.

Some funds perform better than others during the ups and downs of market conditions so we provide you with a wide range of funds in different sectors and asset classes with different risk ratings. Bear in mind that you don't have to invest in just one fund. In fact diversifying your plan across several different style funds can be a wise thing in order to help smooth the returns on your investments.

The range of funds are provided by some of the world's leading managers including Aberdeen Standard, BlackRock, BNY Mellon, Columbia Threadneedle, Invesco, JP Morgan and UBS.

WHY YOUR CHOICE MATTERS

Imagine an athletics team. Now think about all the different events that those athletes will take part in. Why are there specific athletes for certain events? Why not have one person take part in every event? It simply comes down to some individuals being better adapted to certain events than to others.

Likewise with investments you have some which are designed to achieve one goal and others designed to achieve something else.

The question for you is whether you prefer the type of athlete who consistently achieves respectable times and results or the potential of a star who could win the championship but is equally likely to finish last?

In our industry the level of risk you are willing to take to achieve growth is described as your risk appetite, and you need to decide how much risk you are hungry for.

Funds matter because the selections you make will determine how your plan performs and the experience you have whilst meeting your goals.

ASSESSING RISK

To help you understand the level of risk attached to each fund, a risk vs reward scale of 1 to 7 is used.

The scale is calculated using a European industry standard, with 1 indicating lower risk and 7 being higher risk.

You will see the risk indicator in a document referred to as the “KIID”. This is the Key Investor Information Document. You can find copies of these online via your specific product fund centre on our website at www.rl360.com/fundcentres.

If for any reason a fund within the range doesn't use this standard or produce a KIID, our fund data provider, Morningstar, calculates the appropriate risk rating for us.

DIGGING DEEPER

Your adviser can provide you with professional support in choosing the right funds to meet your objectives, but if you want to know more for yourself we provide access to more than just the KIID.

In the Documents section of our online fund centre you will find these documents provided by each fund manager:

Fund Prospectus - a legal document that details the investment objective, policy and strategy of a fund or group of funds. This is an in depth and technical document.

Factsheet - usually produced each month providing a summary of performance, holdings and charges.

The fund centre is also a great place to keep up to date with daily price changes and performance over a selection of time periods and methods. It allows you to produce graphs, look at several funds side by side and produce a printable performance bulletin for all the funds in the range.

It even lets you filter the range of funds in a number of ways including by risk rating. Our online fund centre is updated daily and is the very best place to go to ensure you have all the latest fund information available.

MAKE YOUR SELECTION

The following overview lists each fund available by sector along with a range of information about it. Most of these are clear, but some terms you might be unfamiliar with, so here is an explanation:

ISIN - this is simply a reference which identifies the fund in line with international standards.

Domicile - this is where the fund structure has been established, many of which will be in Luxembourg.

AMC % - annual charge applied by the fund manager for running the fund, already taken into account in the fund price.

Perf fee % - this is a performance fee that may become payable where the fund performance has exceeded a certain amount (in fund literature you might see this referenced as the “benchmark”, “hurdle rate” or “water mark”). Performance fees are normally payable in addition to the AMC but also reflected in the price. The fund prospectus will tell you more.

Fund of funds - this is when the fund invests into a series of other funds, these may be offered by the same fund company or multiple other fund companies.

Morningstar Sustainability Rating - the intention of the Sustainability Rating is to provide an objective measure for how a fund is managing Environmental, Social and Governance (“ESG”) risks. A fund with a 5/5 score has underlying investments that are considered strong at interacting with the environment around them, the people that they deal with and are well governed. This should mean that they are well equipped to deal with future market environments, take advantage of opportunities and survive through regulatory change.

You can make changes to your fund choice at any time, free of charge, after your plan starts. We call this a “switch”. A switch form is available on our website to help you do this. If you are registered to view your plan online and have applied for online switching, you can even conduct your own switches online quickly without the need to post any forms to us.

Data is sourced from Morningstar® and is correct as at 12 March 2021.

EQUITY - GLOBAL

BNY Mellon Long-Term Global Equity

The objective of the fund is to achieve long-term capital appreciation through investments in predominantly equity securities of companies located throughout the world. It may also invest in collective investment schemes (including but not limited to another sub-fund or sub-funds of the Company) and warrants. Derivatives may be used for efficient portfolio management only.

Fidelity Funds Global Dividend

Aims to provide income and long-term capital growth. At least 70% invested in income producing company shares globally. The choice of assets is guided by attractive dividend yields in addition to the potential for capital growth.

Fidelity Global Dividend

The fund aims to increase the value of your investment with low volatility versus the MSCI All Country World (Net Total Return) Index. It also seeks to deliver an income that is at least 25% more than the income produced by companies included in the index.

Franklin Templeton - Franklin Mutual Global Discovery

The fund aims to achieve capital appreciation by investing in common stock, preferred stock and debt securities convertible or expected to be convertible into common or preferred stock of mid or large-cap companies of any nation with a market capitalisation around or greater than US\$1.5 billion. It may also seek to invest in the securities of companies involved in mergers, consolidations, liquidations and reorganisations.

Fundsmith Equity

The Company will invest in equities on a global basis. The Company's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The investment manager adheres to strict investment criteria in selecting securities for the Company's investment portfolio ensuring the Company invests in: high quality businesses that can sustain a high return on operating capital employed; businesses whose advantages are difficult to replicate; which do not require significant leverage to generate returns; high degree of certainty of growth from reinvestment of their cash flows at high rates of return; are resilient to change, particularly technological innovation; and whose valuation is considered by the Company to be attractive.

Guinness Global Equity Income

The investment objective of the fund is to provide investors with both income and long-term capital appreciation. In seeking to achieve its investment objective the fund intends to invest primarily in a portfolio of global equities providing an above average yield (i.e. a higher yield than the yield of the overall global equity market), however, the fund may also invest, to a limited extent, in other instruments such as government bonds and corporate fixed income securities of investment grade rating.

Guinness Global Innovators

The investment objective of the fund is to provide investors with long-term capital appreciation. This is primarily achieved through investment in equity securities of companies that the managers believe are positioned to benefit from one of more of the following: advances in technology, advances in communications, globalisation, or innovative management.

Invesco Global Equity Income

The fund aims to generate a rising level of income, together with long term capital growth, investing primarily in global equities. In pursuing this objective, the Investment Adviser may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, undertakings for collective investment, deposits and other permitted investments.

Janus Henderson Global Equity

The fund aims to achieve above average long-term capital growth, in excess of long-term capital growth that is typically achieved from global equity markets. The fund will invest principally in a concentrated portfolio of global securities with a bias to those companies that have developed strong franchises and competitive advantages. These companies will typically operate in markets that the Investment Manager believes will offer sustainably high levels of growth.

JPMorgan – JPM Global Unconstrained Equity

The fund seeks to provide long-term capital growth by investing primarily in companies, globally. At least 67% of the fund's total assets (excluding cash and cash equivalents) will be invested in equity and equity linked securities. Issuers of these securities may be located in any country, including emerging markets. Equity exposure may be achieved through investment in shares, depository receipts, warrants and other participation rights. Subject to the foregoing, equity exposure may also be achieved, to a limited extent, through investment in convertible securities, index and participation notes and equity linked notes. It will invest at least 51% of its total assets in bonds and other related fixed income securities. It may invest up to 49% of its total assets in cash, money market instruments or other securities.

GLOBAL MANAGED

Artemis Monthly Distribution

The fund aims to achieve an income in addition to capital growth. It aims to achieve its objective by investing in a globally diversified portfolio of assets. Exposure will normally be to global equities, bonds and cash. The proportion of the fund allocated to each asset class as well as the underlying stock selection will be actively managed.

BlackRock Global Funds - BGF Global Allocation

The fund seeks to maximise total return. The fund invests globally in equity, debt and short term securities, of both corporate and governmental issuers, with no prescribed limits. In normal market conditions the fund will invest at least 70% of its total net assets in the securities of corporate and governmental issuers.

BlackRock Global Funds - BGF Global Multi-Asset Income

The fund follows a flexible asset allocation policy that seeks an above average income without sacrificing long term capital growth. It invests globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of undertakings for collective investment, cash, deposits and money market instruments. The fund makes use of derivatives for the purposes of efficient portfolio management including the generation of additional income for the fund. It distributes income gross of expenses. Currency exposure is flexibly managed.

BNY Mellon Multi-Asset Diversified Return

The objective is to achieve long-term capital growth over a period of at least 5 years from a portfolio diversified across a range of assets. It is managed to seek a return in excess of cash (1 Month GBP LIBOR) +3% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

Canaccord Opportunity

Aims to generate capital growth by investing in an internationally diversified portfolio of shares and units in collective investment schemes and individual high quality fixed interest instruments.
